Sports for all from Gerflor

Sports halls come in for all sorts of treatment from enthusiastic athletes and floors are often the most abused. Two badminton halls at Chilwell Olympia Centre in Nottingham have recently been completely resurfaced using Gerflor Taraflex Sports Performance Plus in Lagoon. The new flooring was specified by John Briggs of the Nottingham Badminton Association due to its durability and the fact that it came highly recommended.

"The previous flooring was uplifted after ten months due to too many players falling over and injuring themselves," he explains. "We needed a flooring that would withstand constant wear and tear from our badminton players. Having been recommended for its high performance, Taraflex Performance Plus from Gerflor was specified and met all the requirements in terms of longevity, safety and visual appeal. Because Gerflor offered to become sponsors of the Nottingham Badminton Association, the company was able to incorporate their logo onto the flooring which adds very distinctive appeal."

A new CXP double density foam backing combined with the new D-Max surface, has made Taraflex Performance Plus the highest performance vinyl sports flooring on the market. Over 41% shock absorption considerably minimises any risk of injury, combining comfort with high visual appeal in a broad range of colours to suit any application.

"We are delighted with the result and as far as aesthetics is concerned, the colour of the flooring and the addition of the Gerflor logo enhances the appearance of the courts," concludes Mr Briggs. The flooring was installed by AJ Floorcraft of Derby who achieved Sports Accreditation through this project.
