

caralium®

The mineral composite tile

Warm & durable tile flooring
from Gerflor

Sample Card

Gerflor

Floors to match your imagination

Warm &
comfortable

Caralium® is an entirely new and innovative, mineral based material from Gerflor.

Caralium looks just like slate, ceramic and stone, yet it is warmer underfoot, slip resistant to commercial safety standards, light and easy to handle & extremely durable.

The unique properties of Caralium make it highly resistant to impacts - giving a longer lasting beautiful floor.

- slip resistant

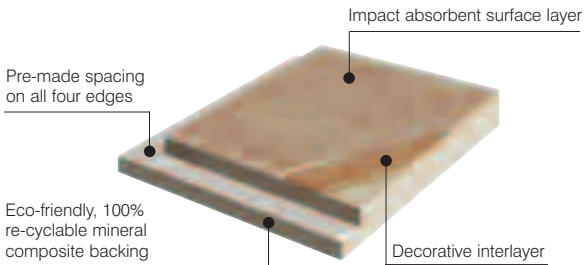

The surface has a high (R10) commercial slip resistant rating. While this does not mean you will not fall it is far less likely.

- stain free & scratch resistant

The special treated surface means that stains such as grease, biro, felt tip pen can be quickly and easily removed by simply rubbing with Caralium cleaner and then rinsed with a small amount of clean water.

- highly durable & impact resistant surface

Due to Caraliums tough surface, it will not crack or break unlike ceramic tiles even if heavy objects are dropped on it.

Durable

Practical for
everyday living

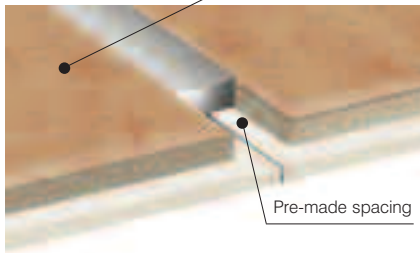

- hygienic & easy to clean
- quiet underfoot making for a quieter home

Has effective sound deadening qualities. It does not magnify sound like ceramic or laminate floors.

- completely waterproof from above & below
- easy to fit
 - The tile can be cut with a sharp DIY knife
 - It is light. About half the weight of an equivalent ceramic floor tile.

Hardwearing slip resistant surface treatment
