Gerflor creates a warm and welcoming hospital environment

Gerflor, leading manufacturer of vinyl flooring, has installed floorcoverings throughout Liskeard Community Hospital in Cornwall. The wards, corridors, shower rooms and sports flooring for the physiotherapy suite are now warm and welcoming.

A variety of flooring types was used including Tarasafe and Taraflex to create highly attractive, hygienic, easy-to-maintain and, above all, safe floors for all users. Tarasafe is a slip resistant floorcovering ideal for use within a high traffic hospital especially in areas where water may be present and users may be unsteady on their feet. Taraflex Sport M+, offering comfort, performance and great shock absorption, was the perfect choice for the physiotherapy suite.

Mark Wood from Lang and Potter in Plymouth explains "We specified Gerflor since we have used their products in previous installations and have never been disappointed with their support both during and after installation."
