Brand new revolutionary Tarasafe™ Ultra H₂O hits the market!

International vinyl and linoleum flooring specialist Gerflor has just announced a new addition to their best-selling Tarasafe™ Ultra range of slip resistant safety flooring: Tarasafe™ Ultra H₂O.

The ultimate choice for wet and dry, barefoot and shod applications, Tarasafe™ Ultra H₂O is an ideal solution for shower and changing rooms, together with any high level risk wet areas where heavy duty slip resistant flooring is needed. Gerflor UK Marketing Manager Nav Dhillon said, "Great news, up until till now no-one has further developed the Tarasafe™ Ultra range. Now however, we've extended the tried and trusted popular Tarasafe™ Ultra range to provide this barefoot and shod option".

Tarasafe™ Ultra H₂O is competitively priced and scores the best possible safety rating in the wet barefoot ramp test (DIN 51097) and wet shod test (DIN 51130). Designed with a raised emboss, Tarasafe™ Ultra H₂O is available in eight stunning colours, which complements Tarasafe™ Ultra's most popular colourways. It is available for delivery in two metre width rolls within 48 hours of ordering to most parts of the United Kingdom and its lighter weight and improved flexibility allow for quicker and easier installation. Nav Dhillon commented, "We think this new product is really outstanding and so do our customers. It provides exceptional barefoot comfort and is an ideal solution for shower areas, changing rooms and any high level risk wet areas".

A hugely popular choice for a host of environments; healthcare, leisure, hospitality, housing and in any applications that require slip resistance to be maintained. "As the Tarasafe™ Ultra H₂O colour choices complement the best sellers in our Tarasafe™ Ultra range; designers can coordinate the right safety flooring solutions all the way through their brief." She said.

Tarasafe™ slip resistant vinyl sheet flooring is deeply inlaid with mineral crystal particles, plus coloured chips, and reinforced with a glass fibre grid to make it durable and hard-wearing, as well as being R11 slip resistant. Designed for heavy use, Tarasafe™ Ultra H₂O carries a 12 year warranty.

Tarasafe™ uses mineral crystals, rather than the industry standard carborundum particle thus it's lighter in weight and colour. By being 100 per cent recyclable it also meets all industry environmental standards. It's easier to handle and is lighter weight meaning fitters have up to five times more blade life than before. Hot welding is also made simple for a water impervious finish. Naturally, Tarasafe™ Ultra H₂O meets the highest safety standards. As well as registering a Grade C in the barefoot ramp test, the safety flooring recorded >36 in the wet pendulum test using a 55 slider. It also meets British and European standards for fire retardation and electrical conductivity.
