

CLIENT: TORQUAY BOYS GRAMMAR SCHOOL  
SOLUTION: TARAFLEX PERFORMANCE®

## Gerflor to the rescue at flood damaged Torquay Boys Grammar School

Torquay Boys Grammar school has a very proud history and can trace its roots back to 1904. Even in those days overcrowding was a problem and Torquay Secondary School, as it had become, was opened in April 1915 with 170 boys. Today, Torquay Boys Grammar School now has 1120 boys and girls in six houses with extensive building programmes taking place in the last 30 years to keep their facilities up to date.

When the school urgently needed to replace their existing wooden floor in their main hall due to flooding, they turned to international flooring specialist Gerflor to supply over 600m<sup>2</sup> of their world-renowned Taraflex® Performance vinyl sports flooring.

The main hall at Torquay Boys Grammar School is used for a mixture of sports activities including health and fitness, racket sports, team sports and gymnastics, so a sports floor that could deliver performance, safety and durability would be paramount in the final choice of the replacement flooring.

Achieving a first-class installation that would be on budget, on time and as importantly, meet the stringent requirements that the school would insist on was a challenge well-met by Plymouth-based Roberts Flooring. Dave Moran, Managing Director, Roberts Flooring commented, "the school had previously had an unfortunate flooding incident which caused their current timber sprung sports floor to swell and become defective."

On the new specification Dave Moran stated, "We approached Gerflor to help propose a suitable solution and it was decided that their Taraflex Performance 9mm thick sports flooring system would be the best answer due to its versatile range of applications as it was suitable for a sporting and educational environment.

"We settled on Mint Green as the optimum colour as it would really compliment the sports line markings that were added to the new floor."

Gerflor have more than 70 years of experience with their Taraflex® sports flooring. It offers a wide range of colours and is suitable for a variety of applications. Taraflex® sports floors have been made since 1947 and used by the largest international sports federations (volleyball, handball, badminton, table tennis) for decades. Through partnerships with these federations, Gerflor has been present at the Summer Olympic Games since 1976.

It's an Olympic pedigree stretching back over an incredible 43 years.

“ We are very pleased with the Gerflor flooring. It was a good choice and has really lived up to its specification ”

Peter Richardson, Site Manager,  
Torquay Boys Grammar School

Taraflex® is available in 17 colours and three wood-effect designs. The Taraflex® Performance product specified for Torquay Boys Grammar School offers a P2 category shock absorbency 35% to 45%. Taraflex® is recognised for providing durability, safety and comfort without impairing performance.

The range also offers greater than 45% force reduction, making it unrivalled in the marketplace in terms of offering comfort for users. Taraflex® meets the EN Standard of 22196 for anti-bacterial activity [E. coli - S. aureus - MRSA] [3] returning >99% levels of growth inhibition.

Peter Richardson, Site Manager, Torquay Boys Grammar School commented, "we are very pleased with the Gerflor flooring. It was a good choice and has really lived up to its specification." Dave Moran added, "the project had to be

done to a very firm timescale to ensure the hall could be reopened to the school and other members of the public who rent the sports hall for several activities including badminton, five a side football and basketball."

Taraflex® Performance is also treated with ProtecSol®, which renders polish redundant and is triple action meaning no polish is ever required, it contributes to easy maintenance and is anti-friction burn and slide/grip. Taraflex® has a double density foam backing and as another bonus, it's environmentally friendly.

Taraflex® Performance from Gerflor meets the EN 14904 Standard for indoor sports surfaces. It's also an ideal solution for renovation works as it's available with the Dry-Tex™ System perfect for new construction or refurbishment projects with damp subfloors.

“ We settled on Mint Green as the optimum colour as it would really compliment the sports line markings that were added to the floor ”

Dave Moran, Managing Director, Roberts Flooring.
