Gerflor to showcase at Lab Innovations show 2015

Lab Innovations, the UK's only event dedicated to laboratory professionals, brings together professionals looking to source the very latest in the market. The NEC show in November this year enables visitors to keep up-to-date with the industry and to see the most innovative products and services to help meet the growing demands of their market place.

It's a market where international flooring and wall protection specialists Gerflor are well-established, together with delivering new, innovative solutions to meet the stringent demands of the market and its environments. Show casing at this year's event Gerflor will be shining a light on their latest dedicated cleanroom flooring solutions.

Alan Thurston, Industry Specialist, Gerflor UK commented, "Attending shows like this enable us to highlight our innovative product ranges to a targeted audience and also raise overall awareness of our brand."

Gerflor provides customized solutions to the specific needs of clean rooms with their products being developed to be fully compliant with the standards and requirements for controlled contamination and extreme chemical resistance. Very plainly put in a somewhat intricate and niche marketplace; Gerflor floors are watertight, resist high traffic and are easy to install, with a myriad of corner and coving solutions available to suit a vast swathe of applications.

A veritable star in the 'cleanroom arsenal' from Gerflor is Mipolam Biocontrol Performance. Treated with a special high performance coating it's chemically resistant and also offers defence against heavy loads. Mipolam Biocontrol Performance complies with GMP Class A for micro-biological cleanliness providing good resistance to bio-decontamination procedures.

Also appearing at the show and new from Gerflor is GTI Control EL5, a fast renovation flooring solution for cleanrooms; easy to install, loose laid, doesn't require glue and is easy to replace and repair.

Gerflor's third new product for 2015 is a Clean Corner System for contamination control in cleanrooms. It's watertight, resistant, very durable and extremely easy to clean. The Clean Corner System is also a decontaminate with no acute angles offering a clean, attractive, uniform finish.

Alan Thurston, Industry Specialist, Gerflor UK finally commented, "Being able to showcase these three products at the Lab Innovations Show is for us a fantastic opportunity. We are particularly keen to highlight our new GTI Control EL5 loose lay product which is a great fit for a host of installations and applications."

See all three products at this year's Lab Innovations Show 2015, NEC, Birmingham 4-5 November 2015, visit Gerflor on Stand B8.
