Perfect Floor & Wall innovations for your Labs and Cleanrooms

The Lab Innovations Show has now established itself on the industry calendar as the UK's only event dedicated to laboratory professionals. The show enables visitors to interact with nation's leading laboratory professionals, from a diverse range of industries...all under one roof.

It's a market where international flooring specialists Gerflor are well-established. Gerflor have been managing life sciences contamination for over 80 years, delivering new, innovative solutions to meet the stringent demands of the market and its environments which embraces; pharmaceuticals, cosmetics, medical devices, together with research labs and the biotechnologies sector. This year will see Gerflor showcase several high-quality life sciences manufacturing solutions aimed at providing cutting-edge technology for a host of applications which will include their ESD Solutions and Mipolam Biocontrol Performance, together with their Clean Corner System and fast-installation cleanroom floor GTI MAX Cleantech range.

The ranges on show this year from Gerflor condense a Life Sciences offer that addresses the rigorous demands of the industry, together with providing a host of high-quality information and advice for visiting professionals. Nav Dhillon, Marketing Manager, Gerflor UK commented, "Lab Innovations this year provides us with a perfect opportunity highlight a number of new very significant ranges and products which includes or fabulous GTI MAX range. It also allows us to get directly in touch with the customer's needs to demonstrate how we can help match products to their life science requirements."

ESD - Flooring solutions that meet all the ESD control standards!

A range of both static-dissipative and static-conductive floors ensures the protection of electronic equipment, components, the protection of people against electro-static discharge risks, together with the protection of premises against explosive risks. The permanent adhesive range which is ideal for new projects is Mipolam EL. Perfect for renovation or busy areas that require a 'no nonsense' swift solution when time is money is Gerflor's GTI EL5. These unique flooring systems need no adhesive. Mipolam EL and GTI EL5 all guarantee the highest level of protection against ESD risk due to their low generation of charges (below 100V acc. IEC 61340-4-5) and are resistant to high traffic. The floors have a great resistance to chemicals which avoids staining in industrial facilities and requires no wax for life.

Flooring solutions certified for GMP Class A and ISO3 cleanrooms!

Mipolam Biocontrol Performance from Gerflor is specifically formulated for cleanroom environments. Treated with a high-performance coating, it's extremely resistant to chemicals, highly resistant to scratching and can withstand very heavy loads. Mipolam Biocontrol Performance is tested by the Fraunhofer Institute and complies with GMP Class A for micro-biological cleanliness and provides an excellent resistance to bio-decontamination procedures. It also has good resistance to bio-decontamination procedure and is bacteriostatic against the development of micro-organism on the flooring. Certified for use in ISO-3 cleanrooms and is 100% recyclable.

Coving corners can be a nightmare! Meet the GMP requirements with Gerflor's Clean Corner System!

In partnership with cleaning professionals Gerflor has developed the Clean Corner System which is a patent pending, innovative corner solution. Years of research and development by Gerflor has led to this unique system which is only effective with Gerflor floors. The Clean Corner System technology meets the requirements of professionals in the pharmaceutical industry in accordance with GMP (Good Manufacturing Practices) including easy coving with limited and easy welding.

The Clean Corner System for contamination control in cleanrooms is watertight, resistant and durable, easy to clean and decontaminate, offering a clean, attractive and uniform finish.

Cleanroom renovation has never been so fast!

GTI Cleantech is a fast installation floor range and is suitable for use in cleanrooms up to GMP Class A.

Meet the Gerflor Team and see all these products at this year's **Lab Innovations Show 2017, NEC, Birmingham 1-2 November 2017, Stand D13**
