Why Gerflor

Since 1937, Gerflor **has designed, manufactured** and **distributed design-led, innovative** and **eco-responsible** floor coverings and wall protection solutions. Present in more than **100 countries**, with **4,500 employees**, **30 subsidiaries** and **12 production sites**, Gerflor serves many activity sectors including health, education, residential accommodation and sport.

WORLDWIDE PRESENCE FOR BETTER SERVICE

Our commitments for a sustainable future

Gerflor teams have always considered customers and the environment as their absolute priorities. Our floor coverings, wall solutions and finishing components are user friendly, healthy solutions. They are designed with respect for our planet to last as long as possible with proposed end-of-life options. From product design through end-of-life, the circular economy is a core priority for the group. We have determined 5 priority commitments to guide our environmental management up to 2025.

Contract Safety Flooring

Tarasafe Impression is a safety flooring collection ideal for hardworking places and has been developed specifically for an extensive range of contract applications.

If you're looking for inspiration and a tough safety flooring that offers both slip resistance and outstanding performance, then look no further.

A decorative vinyl sheet flooring collection with design-led colourways, it is suitable for healthcare, education, retail, public spaces, offices and other commercial interiors.

It also offers a hygienic solution thanks to a revolutionary UV cured ProtecSol® Control surface treatment for easy cleaning and maintenance.

Tarasafe is a range of slip resistant sheet flooring that meets HSE guidelines. Constructed from vinyl with deeply inlaid mineral crystal particles (patent pending) and coloured chips for a decorative design, the range contains no carborundum.

All products in the Tarasafe range are reinforced with a glass fibre grid and are suitable for use in all areas of heavy traffic where slip-resistance, durability and hygienic conditions are required.

A number of products benefit from Sparclean® surface treatment for extreme resistance to soiling and staining.

All Tarasafe floors come with a 12 year warranty and are 100% recyclable, when the product is at the end of its life.

Tarasafe Impression safety flooring is ideal for heavy traffic environments in both the contract and housing markets

Shower Solutions

Tarasafe Ultra H₂O is an enhanced slip resistant safety vinyl floor covering with a raised emboss designed for applications where there are continuous wet areas. It provides exceptional barefoot comfort and is an ideal solution for shower and changing rooms and any high level risk wet areas where heavy duty safety flooring is required.

It is suitable for use in all areas of heavy traffic where slip-resistance, durability and hygienic conditions are required.

Elegance SD shower range is a studded slip resistant vinyl floor covering, specifically designed for barefoot wet areas. Constructed using a high PVC content, with a glass fibre interlayer for additional stability. The flooring complies with BS EN 10581. It is available in sheet form and comes in standard roll sizes of 2m wide.

Elegance SD is suitable for use in schools, indoor leisure centres, hospitals and where an aseptic environment is required.

Mural Calypso is the only wall covering on the market with a coloured backing. It has excellent resistance to tearing, is hygienic with a washable surface and can be hot welded to the flooring thus reducing hospital borne infections. Available in a wide colour palette and range of nature-inspired designs.

Accessories: SITAR drains, floor/wall diminishing strip, cover former, weldable vinyl shower threshold, CA12 angle welding rods.

Installation: Installation should be carried out in accordance with local standards. Subfloor to be flat, smooth, hard, clean and dry prior to laying. Where applicable the subfloor must incorporate an effective Damp Proof Membrane. The material must be allowed to acclimatise for 24 hours prior to installation at a room temperature between 18-24°C. All seams must be heat welded using matching Gerflor welding rod.

Maintenance: No emulsion dressings or polish required. Maintenance should be carried out regularly to retain the appearance and durability of the floor. The floor covering should be maintained with regular sweeping and damp mopping using a neutral cleanser.

Further installation and maintenance instructions are available from Gerflor.

Vinyl Wall Coverings

Mural Ultra Design is a 2m width flexible printed wall covering vinyl sheet, which has a thickness of 1.5mm for an extended durability.

Fully resistant to impact (EN 259), Mural Ultra Design acts as a buffer against damage from beds, trolleys, indoor motorised vehicles and other transportation systems. It is therefore ideal for use as a cladding in large public buildings such as hospitals, care institutions, dental and veterinary surgeries, schools, clean rooms, stores and supermarkets, warehouse and storage areas.

It is made of a coloured backing which comprises up to 30% recycled products. It is 100% recyclable, and the components are 100% compliant with Reach.

Residential Slip Resistant Flooring

Griptex is a warm and comfortable slip resistant vinyl flooring with a unique GFT polyester textile backing that is specifically designed for housing & renovation, it's easy to install textile backed flooring can be loose laid up to 35m². It is slip resistant to HSE guidelines and has an excellent acoustic rating of 16dB. It is water resistant from above and below and has a hygienic and easy to clean **pureclean** surface that doesn't trap dirt and needs less water and detergent to clean.

Texline is tough vinyl flooring with a unique GFT patented textile backing system that gives higher warmth and comfort underfoot, and is safer, easier to clean, quieter and more hygienic than standard vinyl flooring. Texline is available in a range of stunning modern designs and colourways that can be used in any room in your home.

GFT is a textile backing system that has many benefits including higher warmth and comfort underfoot, sound deadening qualities and it can be laid over most existing floors by evening out small imperfections in the sub-floor, reducing the need for extensive and time consuming floor preparation - unroll it, it's laid!

pureclean Unique to Gerflor products, **pureclean** is a tough, easy to clean, slip resistant PU finish that is carefully selected to enhance the beauty and character of the floor.

Beautiful and practical collections that are specifically designed for renovation and new build projects

Homogeneous Flooring

The well-established **Mipolam** range already has an outstanding reputation for its performance in health and education buildings.

The ever popular Mipolam Symbioz™ range, incorporating 100% bio-based plasticisers, has recently been updated to offer a wider range of contemporary colours and designs for these applications.

The Mipolam range is a wide and flexible range of high performing homogeneous compacted floor coverings with all but the Classic products treated with Evercare™, an exclusive surface treatment (the latest pioneering technology on the market).

The vinyls are scuff resistant and need no waxing or polishing to maintain their appearance and colour brightness for years.

The combination of Evercare™ and anti-bacterial and fungicidal treatments also ensures that stains such as blood and iodine can be safely and hygienically removed with minimum water and detergent required. This reduces maintenance costs and lowers the environmental impact.

Suitable for use in most general public areas, schools, offices, indoor leisure centres, factory floors and storage areas, hospital wards and corridors, "clean rooms" and computer suites, where an aseptic environment is required.

The Mipolam range has a legacy going back more than 80 years

ESD Solutions for Dissipative & Conductive Floors

UPDATED

The well-established **Mipolam** range already has an outstanding reputation for its performance in health and education buildings. Mipolam Technical Flooring solutions takes this reputation and offers a complete range of Dissipative, Conductive and ESD floors for heavy-duty, Hi-tech applications: electronics areas, computer rooms, operating theatres, radiology, and cleanrooms.

Mipolam EL5 is a conductive flexible vinyl floorcovering which ensures optimal and consistent conductive properties throughout its full life expectancy.

Mipolam EL7 and **Mipolam Robust EL7** are dissipative flexible vinyl floorcoverings with revolutionary Evercare™ surface treatment for high resistance to chemicals.

Mipolam Technic EL5 is a conductive flexible homogeneous vinyl floor covering available in a tile format.

Mipolam BioControl EL5 is a top-of-the-range ESD floor for cleanrooms. It has a conductive backing to ensure optimal and consistent conductive properties throughout its full life expectancy.

A complete range for Hi-tech applications: electronics and telecommunication areas, computer rooms, operating theatres, radiology

Premium Multilayered Flooring

The **Premium** range is available in Comfort and Compact versions. Recently updated, the range offers 80 colour references across 6 designs for greater creative choice.

The ranges are suitable for high traffic areas so are extremely durable. They have a long lasting appearance through the incorporation of densely pressed colour chips in the wear layer.

Treated with Evercare™ surface treatment with extreme stain resistance and a matt finish, no polish is required for the entire lifetime of the product thus reducing maintenance costs.

Premium Comfort has excellent acoustic and shock absorption properties with high acoustic performance (16dB Metallica range, 17dB all other ranges) and safe underfoot cushioning thanks to its very high density foam backing.

Premium Compact provides excellent resistance to static and dynamic loads. With quick indentation recovery (0.02mm) and superb dimensional stability – minimal rucking when heavy objects are wheeled across the surface.

Ideal solutions for schools, hospitals, retail outlets, offices, public areas as well as many other applications in various markets.

Taralay Multilayered Flooring

UPDATED

Taralay Impression Compact and Acoustic ranges are hardwearing floors that are suitable for medium to high traffic areas including hospitals, schools, commercial and public areas. The range has ultra-low whole life costs thanks to the ProtecSol®2 surface treatment which eliminates the need for polish for the full life of the flooring.

Taralay Initial Compact and Comfort ranges are hardwearing floors that are suitable for normal to high traffic areas. The comfort version offers a 19dB sound rating, which is ideal for those applications where sound insulation is key. Treated with ProtecSol® surface treatment the floors require no polish for the lifetime of the product.

Taralay Libertex is a new generation of Looselay flooring with an innovative MAX3 layer system for enhanced durability, acoustics and easy installation. You can save time and cost with this solution, whereby minimal sub-floor preparation is required, it offers excellent 19dB sound reduction and is hygienic and easy to clean thanks to its unique ProtecSol® surface treatment.

hop* **Taralay Impression HOP** is an innovative and eco-designed solution for looselay installation. It has a double fiber frame and a calendared interlayer to bring a high level of stability even under temperature variations and heavy rolling loads. It has a minimum of 15% recycled content (post-consumed) and the ProtecSol®2 surface treatment provides the best stain resistance. Glue-free for a quick and easy installation.

The ideal flooring for modern interiors

Beyond the norm

As you are unique and each of your projects represents a new challenge, Gerflor gives you the chance to stand out, from 50sqm.

One atmosphere, one style, one floor, but several possibilities...

3 possibilities

1 - COLOUR

the possibility to recolour 32 designs in the Taralay Impression range as you wish

1

Select a design* from the Taralay Impression range

2

Change the colour scheme as you wish

3

Receive your floor sample within 10 days of acceptance of your inquiry by Gerflor

4

Receive and install your customised flooring; delivery lead time: 6 weeks from receipt of your order

* from among 32 eligible designs (see Brochure My Taralay Impression)

My Taralay Impression

UPDATED

2 - COLLECTION

the possibility to select from among **50 exclusive designs**

1

Draw inspiration from Gerflor's 50 exclusive designs and change, if you so wish, the design's colour scheme on www.myfloorbygerflor.com

2

View your customised design on your computer screen before approving it

3

Receive your floor sample within 10 days of acceptance of your inquiry by Gerflor

4

Receive and install your customised flooring; delivery lead time: 6 weeks from receipt of your order

3 - CUSTOMISATION

the possibility to make your floor unique

1

Send us your own file in accordance with the process described in our **specifications**

2

Approval by our technical team

3

Receive your floor sample within 10 days and before all of your floor is made

4

Receive and install your customised flooring; delivery lead time: 6 weeks from receipt of your order

File formats accepted

Files free from copyright only

300 DPI resolution

RAL, Pantone and NCS colour reference

To enhance the visual identity of your company or that of your clients, you can have your logo printed across the width of the roll.

- No metallic ink
- No printing on a plain background
- Design only across the width (2 m)
- No continuity of designs over several rolls

Minimum order: 50 m² (special pricing system)
If you have any questions (pricing, feasibility, technical information), do not hesitate to contact your sales representative

Nerok Multilayered Vinyl Flooring

Nerok Compact is a multilayered vinyl floor covering available in 2m and 4m wide sheet, with a group T wear rating. The product comprises a compacted backing reinforced with a glass fibre veil and a printed design that is protected by a transparent wearlayer.

It offers a -6 dB sound insulation and a resistance to indentation of 0.05 mm. This flooring is protected by the surface treatment, PUR+ mat, ensuring easy maintenance and no required polish for the entire lifetime of the product. It does not contain any heavy metals or CMR 1&2 components, 100% compliant with REACH. The product emission rate of volatile organic compounds is <math><100\mu\text{g}/\text{m}^3</math> (TVOC after 28 days ISO 16000-6). It is 100% recyclable.

Nerok Acoustic is a multilayered vinyl floor covering available in 2m and 4m wide sheet, with a group T wear rating. The product comprises a foam backing reinforced with a glass fibre veil and a printed design that is protected by a transparent wearlayer. It offers a -19 dB sound insulation and a resistance to indentation of 0.10mm.

This flooring is protected by the surface treatment, PUR+ mat, ensuring easy maintenance and no required polish for the entire lifetime of the product. It does not contain any heavy metals or CMR 1&2 components, 100% compliant with REACH. The product emission rate of volatile organic compounds is <math><100\mu\text{g}/\text{m}^3</math> (TVOC after 28 days ISO 16000-6). It is 100% recyclable.

Vinyl Sports Flooring

Taraflex® sports flooring is the number 1 preferred indoor solution for over 60 years. It has been selected for every Olympic Games since Montreal in 1976. Leading sports events organisers and national governing bodies put their faith in Taraflex® as it offers the highest levels of performance, comfort and safety. Every sports person has, regardless of their ability, played at least once in their life time on a Taraflex® sports floor.

Taraflex® flooring is specifically designed for both sporting and non-sporting activities. Catering for elite sporting performance and everyday education and community life.

Taraflex® is versatile enough to be used in various multi-specialist applications and affordable for all new projects and refurbishments. Our sports flooring solutions are used within the education, community, leisure, health & fitness sectors.

Taraflex® SL combines an easy, fast and sustainable installation with the high-quality standards of Gerflor: ease of maintenance, great sports performances and durability. No glue, no compromise.

Taraflex® is the most widely specified sports surface in the world

Taraflex® Comfort

Vinyl Sports Flooring

UPDATED

- > Offers the highest comfort and shock absorption to prevent long-term injuries and immediate injuries upon impact
- > The first Taraflex® sports floor in the P3 category (complies with EN Standard 14904) ≥45% of shock absorption
- > Triple action ProtecSol® for easy maintenance, friction protection and 'intelligent' sliding coefficient
- > Suitable for all levels and all sports
- > Modern and ultra-realistic wood design range, with new maple wood designs produced using actual scans of our world class Connor maple hardwood flooring

5763 Maple Sun / 2404 London Light Blue

Taraflex® Performance + Performance SL

Vinyl Sports Flooring

UPDATED

- > Taraflex® Performance is ideal for a variety of applications including all kinds of sports and leisure activities
- > P2 category sports flooring (complies with EN Standard 14904) 35 to 45% of shock absorption
- > Triple action ProtecSol® for easy maintenance, friction protection and 'intelligent' sliding coefficient
- > Easy, fast and sustainable installation, no need for additional moisture barriers (Performance SL)
- > Modern and ultra-realistic wood design range, with new maple wood designs produced using actual scans of our world class Connor maple hardwood flooring

Modulock

Beech Hardwood Sports Flooring

Connor Sports® is the US market leader in hardwood sports surfacing. Introducing Modulock - a floating sports floor system with a high stability and durability over time thanks to its quality dried beech, to the 8 battens and locking points per panels and to its Bfls,s1 certification.

Our Modulock floor offers an amazing balance between shock absorption and ball rebound, providing an optimal playability and injury prevention.

The light weight of the panels and the interlocking system enable a fast and easy installation, but also a fast and easy removal, which makes Modulock a perfect solution for events in arenas or repeated installations in sport halls. The system offers enough durability to be also installed as a permanent installation.

Modulock panels provide a perfect assembly quality and finishes that allow an excellent installation. Our wide accessory offer completes Modulock solution with aluminium edges, access ramps, reservations and storage racks.

Connor Sports® Solid Beech

			Modulock
Description			
Finish flooring	-	-	Pre-varnished panels of finger-jointed solid beech

Hardwood systems for professional teams

More than half of the teams in the NBA have purchased a Connor Sports® hardwood system:

Outdoor Sports Flooring

Sport Court® Power Game™ Plus modular outdoor sport surfaces are designed for multi-use and are ideal for athletes participating in sport at any level, either professionally or within education and community settings. Build a new court, renovate an existing space, or set up portable courts for a tournament or event.

Designed to overlay outdated concrete or asphalt surfaces, Sport Court® rapidly transforms them into colourful play surfaces that keep athletes safe, allow for year-round sports activity and eliminates costly annual maintenance.

Sport Court® Power Game™ Plus

Sport Court® Power Game™ Plus Outdoor Sports Flooring

- > Multi-use outdoor flooring, ideal for athletes and the community
- > Keep users safe with the lowest skin abrasion of any outdoor surface
- > Designed to overlay concrete or asphalt
- > New Grid Pattern for better water drainage and faster drying times
- > Enhanced locking system for assured stability and safety

Product Construction

Hard courts increase injury risk for athletes

Sport Court® surfaces provide optimal comfort and protect athletes from overuse and stress injuries as well as reduce the likelihood of concussion and stress fractures.

1. **Double-tier** for increased shock absorption
2. **Patented interlocking system** designed to support the movements of athletes and reduce the risk of injury
3. **UV stabilisers** maximise colour-fastness
4. **Backing** designed to promote drainage

Rubber Gym Flooring

There are flooring types that can resist the beating of the free-weight and weight lifting areas. There are floors that look great. There are floors that are made in formats that make them quick to install, interchangeable and replaceable. There are floors that are easy to maintain. Take a look at our Powershock range – high impact rubber solutions for Fitness, designed to be both functional and hardwearing.

Powershock Rubber Gym Flooring

- > Shock absorbing
- > Durable
- > Easy to clean and maintain

Powershock 80 Cardio & Free-Weight Zone

- > Vulcanised rubber is a chemical process through high pressure and temperature enables the sulfur atoms to form links and bridges between long chains of rubber molecules. This increases the overall strength and durability of the rubber
- > Highly resistant to static loads and to dumbbells thanks to the vulcanisation process of this 8mm vulcanized rubber
- > Highly durable
- > Easy to clean and maintain

0002 Black

0001 Dark Grey

Powershock 300 Crossfit & Heavy-weight Area

- > Made from vulcanised rubber, a chemical process that cures and combines rubber and sulphur. Through high pressure and temperature the sulphur atoms form links and bridges between long chains of rubber molecules. This increases the overall strength and durability of the rubber
- > 30 mm high impact rubber
- > Tiles with pre-installed connector pins for ease of installation
- > Powershock 300 avoids deep-impact damage while providing outstanding sound deadening, as well as:
 - Shock absorption
 - Sound insulation 26 dB
 - Protection of subfloor

0001 Dark Grey

Sports Undercarriage System

UPDATED

Designed for multi-use leisure activities our low profile area elastic sports floors have no surface irregularities and perform through their anticipated life, consistently achieving EN 14904.

Ideal for renovation and new build projects floors consist of an area elastic undercarriage system made up of an impervious damp proof membrane, 12mm foam base and 12mm plywood topped with a vinyl or linoleum top surface.

Creation 70 Luxury Vinyl Tiles & Planks (LVT)

Creation 70 Clic is a Luxury Vinyl Tile and Plank system, with clever innovative interlocking technology that makes it fast to install, requires no adhesives and provides a range of inspiring finishes for any interior space.

You can save time and money as it is a fast track, loose lay, clean & dry installation. There is no need to close down the premises as the products can be installed with minimum disruption and over existing floor finishes or imperfect sub floors. It is waterproof as it resists leaks and spillages that can damage wood based products.

Creation 70 Clic is extremely tough and durable and ideal for high traffic environments including retail, hospitality, healthcare, education as well as many other markets.

Creation 70 Looselay is a looselay flooring collection adapted for high traffic applications. Fast and easy to install and ready to use out of the box, it is easily removable without leaving messy adhesive residue. Looselay up to 30sqm

Creation 70 Dryback range is a popular choice for both public and commercial areas that are designed for high traffic wear including retail, hotels, hospitality, as well as many other market sectors. Creation 70 Dryback range offers brand new wood, stone and mineral effect designs. Available in 62 designs and in 9 different sizes with many designs having bevelled edges and embossed finishes for added realism.

Creation 70 is available in Clic, Looselay and Dryback variations

Creation 55 Luxury Vinyl Tiles & Planks (LVT)

Creation 55 Solid Clic is a luxury, vinyl plank flooring with an innovative, built-in, vertical interlocking system that clicks together for quick and straightforward installation without adhesive or specialist tools and fitting skills.

It installs cleanly without creating dust and noise or damage to the surface beneath and can be walked on immediately. Individual planks can also be lifted for easy replacement.

Suitable for medium traffic areas and domestic use, it has a ProtecShield™ surface coating for extra resilience and easy cleaning. The authentic wood designs with enhanced graining are complementary to wide ranging décor schemes.

Creation 55 Dryback is available in wood and mineral effect tiles and planks that can enhance any interior décor. A popular choice for medium traffic areas in the retail, office, administration, leisure, hotel, hospitality markets as well as suitable for domestic use.

Creation 55 is available in Solid Clic, Dryback, Looselay, Looselay Acoustic and Rigid Acoustic variations

0347 Ballerina

Creation 55 Looselay / Looselay Acoustic

are looselay flooring collections adapted for medium traffic applications. Fast and easy to install and ready to use out of the box, they are easily removable without leaving messy adhesive residue. Looselay up to 30sqm. Creation 55 Looselay Acoustic incorporates a backing with an acoustic core which delivers up to 19dB impact sound reduction.

Creation 55 Rigid Acoustic is a decorative interlocking floorcovering assembled with an angle to angle locking system to provide robust and easy installation. Available as a tile or plank Creation 55 Rigid Acoustic is made up of a 0.55 mm thick transparent wear layer, a high definition printing film to provide an hyper realistic design, a Full Rigid Board to provide high performances for heavy renovations and an integrated underlayer 100% recyclable which provides a 19dB sound reduction. The product is 100% recyclable and made with up to 35% of recycled content. It is 100% compliant with REACH.

Saga² Luxury Vinyl Tiles

Saga² is a fast track loose lay tile that provides the durability of a compact tile with the comfort of an acoustic tile. The tile overcomes the difficulty of many irregular sub-floors and prevents their indentations transferring to the surface. With a wide range of stylish designs available and is suitable for high traffic areas including offices, boutiques, public areas as well as other administrative areas.

High traffic floor tile, removable installation suitable for raised floors

GRADUS

Gradus Carpets is a brand of the Gerflor Group and is a UK manufacturer of premium quality carpet tile and plank, broadloom and impervious backed carpets which excel in terms of functionality, aesthetics and ease of maintenance.

Utilising a range of high performance yarns, Gradus' extensive range of carpets are suitable for a wide variety of contract applications including commercial office, healthcare and education environments.

Premium Collection

- Premium design and quality to suit the performance requirements of any area be it a commercial office, education or healthcare application
- Complementary yarn systems and colour bank provide coordinated design schemes

See pages 154 - 173

High Performance Contractor Collection

- Competitively priced without compromising design or performance

See pages 174 - 182

Secondary Barrier Matting

- Provides a solution for entrances, breakout areas or any heavy duty traffic area where contamination needs to be treated effectively
- Unique yarn system removes soil from foot traffic whilst absorbing moisture and being easy to clean

See pages 183 - 187

The Dementia Services Development Centre at the University of Stirling have undertaken a review of the Carezone range and have rated its design in relation to dementia design principles and its usability within a dementia-inclusive environment.

All Carezone colours are rated as Class 1a and are suitable for use in dementia applications. For an environment to be considered 'dementia-inclusive' careful consideration must be given to the specification of adjacent finishes with a maximum contrast of 10 points LRV between adjacent floor surfaces.

Fast Track Flooring Tiles

GTI Max is an ideal solution for heavy traffic applications and are popular choices for retail, industrial and warehousing environments. A fast renovation solution which can be installed over most existing floors where minimal sub floor preparation is required, as well as no adhesives. Cost effective solutions both in the installation (you do not need to stop production or close the premises) and in terms of easier maintenance (with PUR+ surface treatment).

Attraction® is a fast track easy solution with interlocking edges which allows for rapid loose lay installation and replacement. It is cost effective as there is no need to close down the premises and can be installed on a sub floor with minimal preparation. With an ProtecSol® 2 surface treatment it requires minimal maintenance and is a highly durable solution suitable for heavy traffic applications in the retail and industrial and many other markets.

Creation 70 Connect is fast track large format loose lay tile that overcomes the difficulty of many irregular sub-floors, making it ideal for refurbishments. Its resilient reinforced core offers dimensional stability and noise absorption whilst being comfortable underfoot. It comes in a range of popular designs and is suitable for medium traffic areas including specialist chains, shops, offices, education and public buildings.

Fast track flooring that saves you time money and inconvenience

ESD Technical Tiles

UPDATED

GTI® EL5 is the ideal solution for heavy traffic applications where an ESD solution is required such as laboratories, data centres, cleanroom, healthcare and ATEX areas. It offers all the benefits of a GTI tile with Evercare™ surface treatment and electro-conductive properties.

GTI® EL5 Connect is an electroconductive, looselay, heavy-duty tile with outstanding resistance to traffic. It is available in an interlocking tile format with dovetails for fast and easy installation.

GTI® EL5 Cleantech is an electroconductive, looselay, heavy-duty tile with outstanding resistance to traffic. It is available in a square format with welded joints for clean environments and watertight systems.

A complete range for Hi-tech applications: electronics and telecommunication areas, computer rooms, operating theatres, radiology

Compact Linoleum Flooring

DLW Marmorette is a calendered linoleum compact floorcovering in sheet, 2m wide, providing excellent resistance to everyday wear and tear in high traffic areas. Its weight is 2400gr/sqm in 2.0mm, 2900gr/sqm in 2.5mm and 3800gr/sqm in 3.2mm. It features a marbled design and presents a matt finish, is composed of 98% bio based materials (linseed oil, wood flour, resins, cork, minerals and jute fabric) among of which 76% are rapidly renewable.

Marmorette LCH Dissipative Linoleum for ESD Areas Marmorette LCH is a calendered linoleum compact dissipative floorcovering providing excellent resistance to everyday wear and tear in high traffic areas.

DLW Colorette is a calendered linoleum compact floorcovering in sheet, 2m wide, providing excellent resistance to everyday wear and tear in high traffic areas. Its weight is 2900gr/sqm in 2.5mm. It features a speckled design and presents a matt finish, is composed of 98% bio based materials (linseed oil, wood flour, resins, cork, minerals and jute fabric) among of which 76% are rapidly renewable.

DLW Uni Walton is a calendered linoleum compact floorcovering in sheet, 2m wide, providing excellent resistance to everyday wear and tear in high traffic areas. Its weight is 2900gr/sqm in 2.5mm. It features a uni design and presents a matt finish, is composed of 98% bio based materials (linseed oil, wood flour, resins, cork, minerals and jute fabric) among of which 76% are rapidly renewable.

Refer to our installation techniques on: www.gerflor.co.uk

The original no-polish-for-life solution.

This unique UV-cured polyurethane surface treatment protects the floorcovering and eliminates the need for costly emulsion dressings throughout the life of the product.

Developed exclusively by Gerflor back in 1987, Protecsol® is a permanent, factory applied treatment which has been proven independently to reduce both the time and costs required to protect standard, resilient floorcoverings.

Gerflor is an innovative manufacturer and continuously strives through heavy investment in R&D to meet and exceed its customers expectations both in terms of product quality and in low environmental impact.

Exclusive to Gerflor

Low environmental impact

All the advantages of Protecsol®, and more!

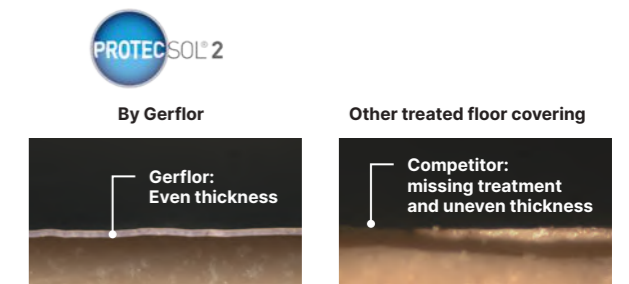

PROTECSOL® 2 technology combines all the advantages of Protecsol®, tested and approved over 20 years ago: ease of maintenance, no need for wax and polish for life, water and detergent savings, plus two additional benefits:

① The best stain shield

Highly durable:

Exclusive surface treatment applied by UV lasercross-linking provides superior durability and an even surface thickness, creating an impenetrable barrier against stains and chemicals.

Longer life expectancy.

Water-repellent effect:

The surface treatment creates a 100% non-porous barrier to prevent all liquids and chemicals from penetrating the materials, remaining on the surface.

Simple and easy stain removal.

② Matt effect for enhanced design

SparClean®

New generation of surface treatment for Tarasafe safety flooring.

SparClean® is a powder coated treatment that when heated forms a totally smooth surface between the mineral crystal particles, eliminating dirt traps and setting new standards for cleanliness and hygiene. The unique method of manufacture ensures that the slip resistance of the Tarasafe safety flooring is not impaired in any way, yet provides a safety floor that is easy to clean.

SparClean® is a permanent surface treatment that gives extreme resistance to soiling and staining, offers excellent resistance to chemicals and ensures long term product durability.

evercare™ TECHNOLOGY

An exclusive patented technology by Gerflor.

The best chemical stain resistance surface treatment.

Highly durable:

Exclusive surface treatment applied by UV laser cross-linking provides superior durability and an even surface thickness, creating an impenetrable barrier against stains and chemicals found in healthcare like betadine, eosin or anti-bacterial hand gel.

Longer life expectancy.

100% non-porous surface:

The surface treatment creates a 100% non-porous barrier to all liquids and chemicals, keeping all stains floating on the surface.

Simple and easy stain removal.

Protecshield™

The NEW surface treatment by Gerflor.

This high performance polyurethane surface treatment (Protecshield™) provides ease of maintenance, prevents micro-scratches and has a ultra matt surface finish.

Improved Performance

Microscopic view (x5)

Standard varnish

Protecshield™

Enhanced Durability

Carpets

Maintain Appearance

- > Carpet should be vacuumed daily using a heavy duty upright vacuum cleaner.
- > Deep Cleaning to remove bacteria and viruses
- > Carpet should be deep cleaned on a regular basis with frequency depending on the type of area and volume of traffic
- > Gradus has worked with Seldon Research to establish a range of cleaning products developed to disinfect against bacteria and viruses
- > Contact Gradus for more information

Daily cleaning to remove surface soil

PUR+

Polyurethane surface treatment.

PUR+ surface treatment provides excellent cleaning characteristics and improved resistance to scratching. It significantly delays application of wax and provides excellent resistance to chemicals.

PUR Polyurethane surface treatment.

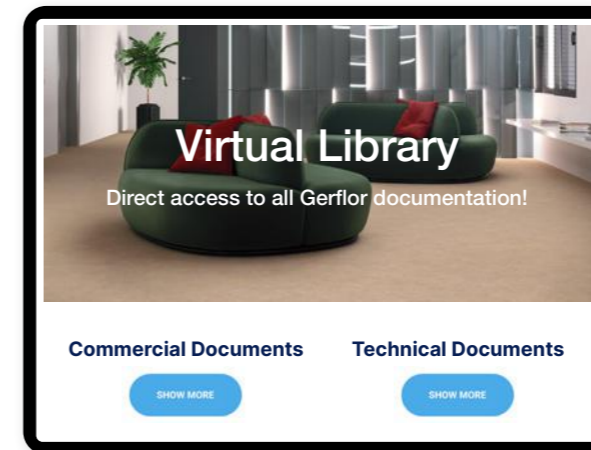

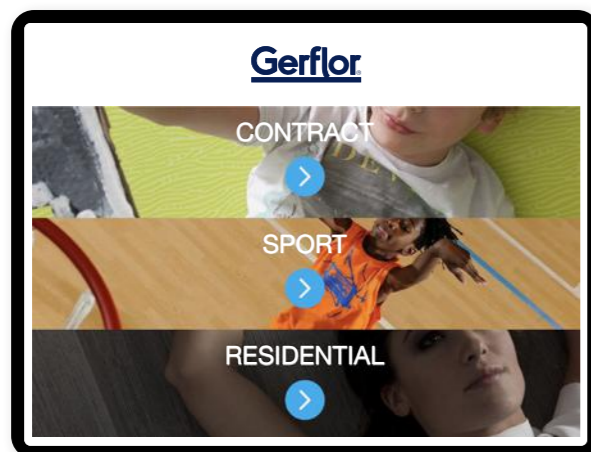

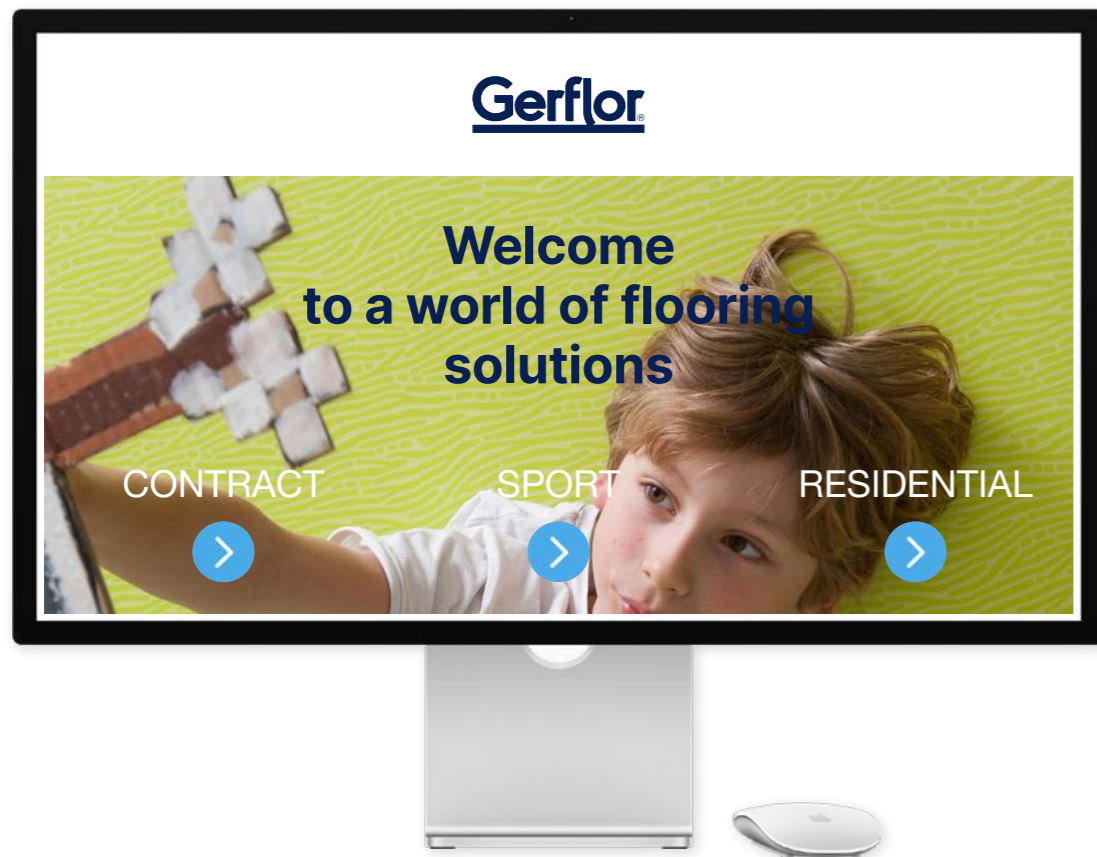

PUR surface treatment is a good foundation for routine maintenance and avoids the immediate use of an acrylic emulsion after installation.

PU Protective PU factory seal.

This factory coating initially applied is an installation protection and a good foundation for routine maintenance. Acrylic emulsion / polish is required after installation.

New design, new navigation!

A website you can **access on your tablet or smartphone** everywhere!

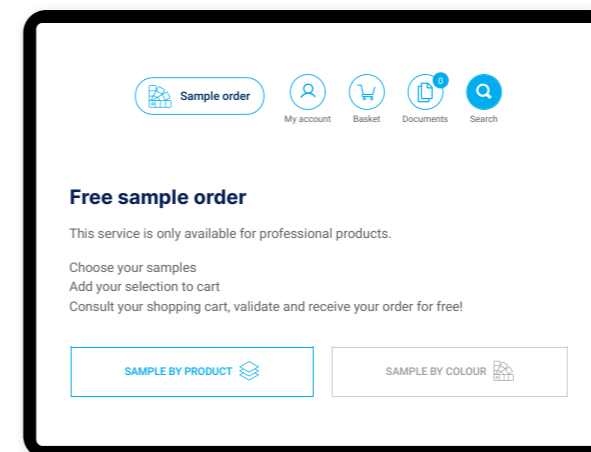

1 Virtual Library

Access to all commercial and technical documentation that will help you developing your projects.

2 Interior Designer

The Interior Designer provides you a real time simulation of the floor selected, either in your own photo or in a pictures' gallery.

3 Free Samples

Samples of our products are readily available on request and we aim to process your order within 24 hours.
