# Gerflor & Gradus – The Care Home Specialists

With over 100 years of combined experience in the contract interiors sector, together we have built an unrivalled reputation for quality and service.

The **Gerflor group** is well known as a credible and valued supplier of complete flooring solutions for both commercial and residential markets. This makes Gerflor a great partner for the Care Home sector as all types of buildings and finishes can be catered for. Whilst maintaining the technical performance and the design aspect of our floorcoverings, Gerflor manufactures ranges with the environment in mind, as well as the health and wellbeing of end users. We have recognised brands ideal for many environments, including our Mipolam, DLW, Tarasafe, Taraflex®, Latour 2 and GTI flooring ranges.

**Gradus** is a UK manufacturer of contract interior solutions, these include wall protection, stair edgings, floor trims, barrier matting and LED lighting. Gradus control the design from initial concept through to finished products including specialist CAD design and the manufacture of tooling. This ensures that quality is maintained and provides customers with an efficient, flexible, and fast service.

Many years understanding the contract interiors sector has shown us the key considerations required to deliver a successful project...

### Reducing life cycle costs

Highly active environments with frequent movement of both equipment and people, necessitate the use of durable and easy-to-maintain materials. To address this need, Gerflor offers flooring products made from top-quality durable materials. Additionally, Gradus wall protection, matting and stair nosings can play a significant role in reducing a buildings life cycle costs by decreasing maintenance and repair expenses.

### Sustainability

Gerflor and Gradus offer a range of environmentally friendly flooring, wall covering, and accessory solutions that incorporate recycled materials, are recyclable at the end of their life, and are both durable and low maintenance. These products and sustainable initiatives play a crucial role in supporting our customers transition towards net-zero.

### Easy clean & stain resistance is key

Gerflor's patented flooring surface treatments and unique clean corner system, facilitate quick and efficient cleaning as well as providing unrivalled stain resistance. Whereas Gradus' wall cladding and matting solutions protect surfaces adding an additional layer of protection.

### Reducing the risk of slips, trips and falls

According to the Health and Safety Executive (HSE), slips and trips account for over a third of all major injuries in the workplace. Gerflor flooring has been developed to offer excellent slip resistance. Gradus' uniquely designed stair edgings also play a crucial role in preventing slips, trips and falls on stairs.

### Inclusive Design

We're passionate about promoting independent living and ensuring that people continue to live independent and fulfilling lives for as long as possible. Understanding the requirements of the end user as well as working alongside evolving building standards and guidance to produce complementary products has been a key part of our success. Many of Gerflor and Gradus' products have been accredited by the world-leading Dementia Services Development Centre at the University of Stirling for use in dementia living areas.

### DSDC Accreditation

The Dementia Services Development Centre have undertaken a review of some product ranges contained within this document, and have rated their design and usability within a dementia-inclusive environment as either as Class 1a or 1b. Look out for the DSDC logo.

# Gerflor and Gradus Services

## Technical & Specification Support Specialists

Gerflors' dedicated Specification Managers can assist you with all your specification needs. Whether it's a new build or refurbishment project we have the expertise and innovations to meet all budgets. Hand in hand with our partners, we work together to propose the optimum solution for the client's needs, utilising the most appropriate safe, hygienic and sustainable solutions for the specific applications. We don't stop at providing specification advice, we can also provide a free site survey where one of our dedicated area managers can visit, assess and audit the facility, and make improvement suggestions to ensure the buildings interiors are future proof.

The Technical Support team is available to offer advice on the specification and installation of products, including guidance on the latest healthcare building standards and legislation. Be rest assured that Gerflor has a world-class pedigree of products that are tried and trusted and deliver every time. All backed up by a network of technical, specification and customer support teams.

## Sampling Support Services For Every Need

We offer a free sample service for all our clients. Whether it's a range overview binder, loose sample (standard or bespoke), supporting literature or if it is something bespoke you need like a mood board or test material, contact us and we will aim to supply the sample for your required need. To request a sample, literature or anything else, email [contractuk@gerflor.com](mailto:contractuk@gerflor.com) or [imail@gradus.com](mailto:imail@gradus.com) or call **01625 428922**

## Local Stock for Fast Delivery!

Best Sellers are in place locally in the UK. The Gradus manufacturing facility in Macclesfield and a new warehousing and distribution facility based in Winsford

offers a broad range of in-depth stock to provide an enhanced service level to our customers. Essential when time is of the essence and our customers need innovative products and fast delivery for those essential quick turnaround projects. Speak to our Specification Managers for stock availability or any further information needs.

## Specification Documents and BIM Objects

As an NBS partner you have access to a single source for product information and incorporates the Gerflor and Gradus products. NBS Source provides an additional level of enhanced product data, in a consistent, structured format that will integrate seamlessly into your project workflow.

## CPD's and Training

As members of RIBA CPD Providers Network we offer a full range of RIBA assessed and approved CPD seminars covering: Vinyl Flooring, Sports Flooring, Matting, Wall Protection, Stair Edgings and Industry specific CPDs such as Healthcare and Industry.

## Stainless Steel Wall Cladding & Protection Systems

### Stainless Steel Pushplate & Kickplate

Stainless steel door protection can help prevent damage and avoid expensive repairs and replacement doors. The hygienic nature also makes these products ideal for use in environments such as food preparation.

### Stainless Steel Corner Guard

Provide excellent protection against severe impact, offering durable and hygienic protection to the most vulnerable of interior environments.

### Stainless Steel Cladding

Suitable for use in areas that are subject to high levels of wheeled traffic such as service corridors in healthcare and retail environments. Also ideal for use in environments such as food and pharmaceutical preparation and manufacture due to the hygienic properties.

### Stainless Steel Wall Guard

The hygienic nature of the stainless steel makes it ideal for use in environments such as food and pharmaceutical preparation and manufacture.

# Nurse Stations

Key considerations when selecting Flooring and Wall Protection products for Nurse Station environments

- ✓ A bright, calm and welcoming environment
- ✓ Products that promote hygiene and infection control
- ✓ Warm, quiet and comfortable underfoot
- ✓ Able to withstand heavy traffic and rolling loads
- ✓ Easy clean and low maintenance/lifecycle product costs
- ✓ Protect walls from damage caused by mobile equipment
- ✓ Protection of vital medical equipment

Options shown are a small selection, full colour range available on our website.

## Safety Flooring

### Tarasafe Impression

A tough, hygienic and durable safety flooring that offers R11 slip resistance, available in wood effect & mineral designs.

## Wall Cladding

### SureProtect Endure Wall Cladding

Manufactured from impact resistant PVC-u which is through-coloured and textured to conceal the effects of impact and abrasion. It is easy to clean and provides a cost-effective way to maintain the appearance of a building.

## Wall Protection

### Corner Guard

Ideal for protecting one of the most vulnerable parts of a building from damage caused by everyday wheeled and pedestrian traffic.

### Bed Head Protector

Designed to prevent damage to walls and wall mounted medical equipment from beds or chairs that are frequently moved around, elevated or inclined.

# Staff Room

Key considerations when selecting Flooring and Wall Protection products for Staff Room environments

- ✓ A bright, calm and welcoming environment
- ✓ Warm, quiet and comfortable underfoot
- ✓ Easy to clean and low maintenance/lifecycle costs
- ✓ Wall Protection system to protect vulnerable walls and corners

Options shown are a small selection, full colour range available on our website.

## Wall Strip

Wall strips protect walls against scuffs, scratches and abrasion caused by chairs, tables, and other moveable objects. Manufactured from scratch and stain resistant PVC-u, and through-coloured and to conceal any impact.

WST150N 150mm (h) no tape  
WST150T 150mm (h) with tape

## Safety Flooring

### Tarasafe Impression

A tough, hygienic and durable safety flooring that offers R11 slip resistance, available in wood effect & mineral designs.

Key considerations when selecting Flooring and Wall Protection for Wetroom environments

- ✓ High slip resistance both barefoot and shod application
- ✓ Watertight floors and walls
- ✓ Resistance to stains and chemicals
- ✓ Easy to clean and maintain

Options shown are a small selection, full colour range available on our website.

Safety Flooring

Tarasafe Ultra H<sub>2</sub>O

High performance slip resistant safety flooring for wet and dry, barefoot and shod applications, meets 36+ HSE guidelines.

7513 Seagrass  
LRV 36.2

7720 Iceberg  
LRV 36.2

Wall Cladding

SureProtect Pure Hygienic Wall Cladding

SureProtect Pure Creates an impermeable barrier to moisture and bacteria. The smooth, easy to clean surface is an excellent alternative to ceramic tiles, removing the need for grout which can harbour bacteria.

Iceberg  
LRV 65.96

Iron  
LRV 14.63

Key considerations when selecting Flooring and Stair Edging products for Stair environments

- ✓ Excellent Slip Resistance properties to reduce the risk of potential slips and falls – select insert suitable for the environment.
- ✓ Cleaning & Maintenance – ability to withstand heavy cleaning and maintenance regimes
- ✓ LRV is of particular importance in these areas. Colour contrast between floorcovering and stair edging must achieve a 30-point LRV difference as a standard industry requirement
- ✓ Fixing Method – install with Gradus Grip stair edging adhesive for a hygienic solution and allowing easier maintenance and lower life cycle costs

Options shown are a small selection, full colour range available on our website.

Stair Edgings

XT Aluminium Stair Edgings

Gradus XT aluminium stair edgings (stair nosings) offer improved performance when used in areas where more intensive cleaning is required e.g. healthcare & education applications. A unique locking mechanism secures the insert in place without the need for adhesive, offering a robust solution for this type of environment in addition to reducing the risk of slips, trips and falls on stairs.

Profiles for Carpet

Wall Cladding

SureProtect Endure Wall Cladding

Manufactured from impact resistant PVC-u which is through-coloured and textured to conceal the effects of impact and abrasion.

004 Granite

003 Clay  
LRV 33.86

# Laundry & Storage

Key considerations when selecting Flooring and Wall Protection products for Laundry & Storage environments

- ✓ Resistance to heavy rolling loads
- ✓ Resistance to heavy traffic
- ✓ Easy clean applications to reduce maintenance and lifecycle costs
- ✓ Robust wall protection solution to protect the building from damage

Options shown are a small selection, full colour range available on our website.

## Rubber Corner Guard

A heavy-duty durable profile designed to reduce maintenance costs of corners in areas subject to heavy wear and impact.

## Rubber Wall Guard

A heavy duty durable profile designed to reduce maintenance costs for areas subject to heavy wear and impact.

## Aluminium Chequer Plate

Aluminium chequer plate wall and door panels are designed for heavy duty surface protection. They are lightweight, easy to install and easy to keep clean.

Code: CPA2/2500/1250

# Communal and Staff WCs

Key considerations when selecting Flooring and Wall Protection for WCs

- ✓ Good slip resistance.
- ✓ Watertight floors and walls.
- ✓ Resistance to stains and chemicals.
- ✓ Easy to clean and maintain.

## Safety Flooring

### Tarasafe Impression

A decorative vinyl sheet flooring collection with 20 design-led colourways, a HSE 36+ slip resistance, and an R11 wet slip resistance rating.

### Tarasafe Standard

Outstanding safety flooring where slip resistance, durability and hygienic conditions are required, meet 36+ HSE Guidelines.

## Wall Cladding

### SureProtect Endure Wall Cladding

Manufactured from impact resistant PVC-u which is through-coloured and textured to conceal the effects of impact and abrasion. It is easy to clean and provides a cost-effective way to maintain the appearance of a building.

### SureProtect Design Wall Cladding

This PVC-u sheet provides a modern and stylish wallcovering combined with excellent surface protection.

Options shown are a small selection, full colour range available on our website.

# Innovation, Service & Design

## Surface Treatment & Cleaning

Resilient flooring surface treatments can be incredibly beneficial in hospital environments, where cleanliness and hygiene are of the utmost importance. Gerflor Evercare, ProtecSol2 and Neocare use antimicrobial agents in the resilient flooring, which can inhibit the growth of bacteria and other micro-organisms. This helps to create a cleaner and healthier environment for patients, staff, and visitors.

Additionally, these coatings make resilient flooring easier to clean, reducing the risk of cross contamination and the spread of diseases. Surface treatments also provide slip resistance, which can help to prevent falls and injuries in hospitals. This is important in areas where spills are common, such as operating rooms, laboratories, and patient rooms.

## Gradus Grip

- Save time
- Save money
- Gradus 10 year warranty
- Rapid curing
- No more screws & plugs
- Ultra strong bond

Download the NBS at [www.gradus.com](http://www.gradus.com)

Also ideal for Floor Trims, Corner Guards & Skirtings.

## Service

Gerflor is a leading provider of healthcare flooring solutions and offers technical and specification support for new builds and refurbishment projects. Their healthcare specialists work hand in hand with partners to propose safe, hygienic, and sustainable solutions that meet all budgets. Gerflor provides free site surveys, offers advice on the latest healthcare building standards and legislation, and has a network of technical, specification, and customer support teams. They also provide a free sampling service for all their healthcare clients and have local stock in place for their best-selling ranges. Gerflor's specification documents and BIM objects are available on NBS Source.

Gradus a leading provider in wall protection offers a wall protection contracts team that provides peace of mind for contractors and clients throughout the design, tender, and delivery stages of numerous projects. They also provide technical support, sampling services, and RIBA assessed and approved CPD seminars. Additionally, their wall protection products have been awarded a supplier ProCure 23 certificate and their BIM objects provide up-to-date, accurate data on their wall protection products. In addition to its other products, Gradus offers a variety of solutions for the healthcare industry, including stair edgings, entrance matting, and capping and coving products.

## Clean Corners

Controlling contamination in healthcare facilities is always a challenge. Corners are where most issues are found, due to their shape making cleaning and decontamination difficult. If they are poorly welded, they can tear or sag under the weight of traffic, and over time they can lose their water-tightness.

In partnership with cleaning professionals, Gerflor has developed the Clean Corner System: a patent pending innovative corner solution. Years of research and development have led to this system that creates a watertight, durable and hygienic solution suitable for all Gerflor PVC floors.

## Supply & Fit

Gradus' wall protection supply and fit service provides a comprehensive solution for safeguarding walls in healthcare buildings. The service includes the supply and installation of corner guards, crash rails, and wall cladding, designed to withstand impact and abrasion, reducing the need for repairs and maintenance. The products come in various materials, finishes, and colours, allowing for customisation to suit any interior design scheme. With a team of experienced installers, Gradus ensures products are fitted to the highest standards, providing maximum protection and a seamless finish. The expert advice and guidance supports customers to choose the right products for their specific needs, ensuring compliance with safety requirements and building regulations.

## Colour Contrast

Colour contrast and light reflectance value (LRV) are essential considerations when it comes to achieving building standards in the UK and promoting inclusive design. Colour contrast refers to the difference in colour between two adjacent surfaces, while LRV measures the amount of light a surface reflects. By using either high-contrast colours and LRVs that meet the recommended standards (30 points difference between floors and walls) or similar tonal colours (8-point difference between adjoining floor coverings), designers can create spaces that are safer and more accessible for all users. For example these factors can significantly impact how people with visual impairments navigate and perceive spaces. This approach can also help buildings meet legal requirements for accessibility, such as those outlined in the Disability Discrimination Act (DDA) and Building Regulations Part M.

## Design

Good design can play a crucial role in creating a healing environment for patients in hospitals. When it comes to walls and floors, it's important to consider both the aesthetics and functionality of the design. For instance, soothing colours and patterns on walls and floors can help to reduce stress and anxiety for patients, promoting a sense of calm and comfort.

In addition, inclusive design should also be considered in hospital design. This means designing with the needs of all patients in mind. For example, non-slip flooring can help to prevent falls, while tactile surfaces can assist patients with visual impairments.

Overall, thoughtful design choices in hospitals can have a significant impact on patient recovery and well-being, making it an essential aspect of healthcare design. Gerflor and Gradus offer a unique combination of floor and wall coverings. By using our innovative specification tool and service, specifiers can design healing and inclusive spaces with ease.
