SECTOR: HEALTHCARE CLIENT: MORRISTON HOSPITAL SOLUTION: SURFACE PROTECTION, HANDRAILS

SPM Provide safe and secure hand rails

"It was refreshing to see a company developing a new innovative handrail that moved away from the old ugly systems traditionally used in other hospitals. In addition to this the product quality was second to none and the fit between the wall returns and handrail sections was particulary good."

Lynsey Jones, Assitant Director of Planning, Abertawe Bro Margannwg University NHS Trust.

SPM has "reinvented" wall protection and hand rails by creating a comprehensive range of products to meet all of today's technical and design constraints.

The range includes particularly elegant handrails with a PVC insert strip and curved, unobtrusive brackets. They are ideal for all buildings open to the public: corridors and stairways in public and private hospitals.

They are available in a range of finishes and bracket designs including a 'DDA - compliant' system.

SPM Starline handrails have been used extensively throughout Morriston Hospitals new burns facility.

The unit provides both inmpatient and outpatient facilities and incorporate two operating theatres, the unit has recently been awarded regional burns centre STATUS for South Wales and South West England.

Lyndsey JONES, Assitant Director of Planning, Abertawe Bro Margannwg University NHS Trust, specified SPM handrails for two reasons...' It was refreshing to see a company developing a new innovative handrail that moved away from the old ugly systems traditionally used in other hospitals. In addition to this the product quality was second to none and the fit between the wall returns and handrail sections was particulary aood.'

HEALTHCARE | gerflor.co.uk

SPM surface protection products have been used as an integral part of new build and ongoing redecoration programmes throughout hospitals and care homes in the UK.

The wall protection system satisfies multiple criteria to suit a variety of applications such as hospitals, schools, and canteen kitchens. We have perfected solutions to cater for all your needs through our extensive experience in the health sector. Our systems are designed for every situation: they resist shock, reduce wear, aid mobility, and ensure maximum hygiene.
