Please check latest technical information on our websites www.gerflor.co.uk & www.gradus.com or with a sales advisor prior to ordering.

Gerflor & Gradus – The Commercial Office Specialists

With over 100 years combined experience, Gerflor & Gradus have forged an unrivalled reputation for quality, design and service. Now, we extend our expertise to the commercial office sector, offering a complete range of flooring and interior solutions.

Gerflor specialises in floor and wall solutions that are developed to meet the specific needs of commercial office projects through technical performance and design choices. Our products provide the durability, acoustic performance and slip-resistance required, and are designed to last as long as possible to help preserve the Earth's resources.

Gradus is a UK manufacturer of contract interior solutions including barrier matting, stair edgings, floor trims, wall protection and LED lighting. Our products are designed in-house to provide high quality, long-lasting products that balance safety, performance and aesthetics. Our long-standing commitment to the environment is integrated into the action plans of all aspects at Gradus.

Explore our complete range of floor and wall products for all areas of a commercial office and create a comfortable and stylish space that allows everyone to work effectively.

Key considerations required to deliver a successful commercial office project...

Complete Solution
Gerflor & Gradus deliver a complete range of floor and wall coverings for every area of a commercial office building. From entrances and staircases to workstations, canteens and WC's, we provide front and back-of-house solutions from one trusted source, making it simple to create cohesive, functional spaces throughout a project.

Acoustics
Noise from footsteps, dropped objects and moving chairs on upper office floors can transmit below, while talking and walking reverberates, creating a disruptive, and stressful working environment. Gerflor provides carpet and resilient floorcoverings designed to reduce impact sound and improve sound absorption, creating a quieter, more positive place to work.

Inclusivity
Gerflor & Gradus provide a broad range of products, designs and colour options from one trusted source, to provide a suite of solutions that work together for every type of space and every person. From soft, soothing tones to vibrant, energising patterns, our floor and wall options balance style with practicality to support diverse environments and needs.

LED Mood Lighting
Static or harsh lighting can make workspaces distracting and uncomfortable. Gradus provides Architectural LED Lighting products that deliver soft, ambient illumination with flexible control. Easily adjust the colour or brightness at the touch of a remote to create an adaptable environment that enhances comfort and productivity.

Safety
According to the Health & Safety Executive (HSE), slips and trips account for over a third of all major injuries in the workplace. Gerflor flooring has been developed to offer excellent slip resistance and Gradus' uniquely designed XT stair edgings play a crucial role in preventing slips, trips and falls on stairs.

Sustainability
Gerflor & Gradus offer a range of environmentally friendly flooring, wall covering and flooring accessory solutions that incorporate recycled materials. These products are also long lasting and easy to maintain.

Gerflor and Gradus Services

Technical and Specification Support Specialists

Our dedicated commercial office specialists can assist you with all your specification needs. Whether it's a refurbishment project or new build, we have the expertise and innovations to create your ideal interior scheme. We work together to propose the optimum solution for the clients' needs, utilising the most appropriate safe, durable and sustainable solutions for the specific applications. We don't stop at just providing specification advice, we can also provide a free site survey where we will visit, assess and audit the facility and make suggestions on improvements to future proof the building interiors.

The Technical Support team is available to offer advice on the specification and installation of products, including guidance surrounding the latest building standards and legislation. Be rest assured that Gerflor & Gradus have a world-class pedigree of products that are tried and trusted to deliver every time. All backed up by a network of technical, specification and customer support teams.

Sampling Support Services

We offer a free sample service for all our clients from product overview binders, loose samples to supporting literature. For something bespoke like mood boards or test material, contact us and we will aim to supply the sample for your required need. To request a sample, literature, or anything else call 01625 428922 or email contractuk@gerflor.com or imail@gradus.com.

Local stock

We stock our best-selling product ranges locally in the UK. Our warehousing and distribution facilities in Winsford and Macclesfield offer a broad range of in-depth stock to provide an enhanced service level. Essential when time is of the essence and our customers need innovative products and fast delivery for essential quick turnaround projects. Speak to our commercial office specialists for stock availability or further information.

Specification Documents and BIM Objects

NBS provides access to a single source of product information and BIM objects for Gerflor & Gradus products. NBS Source provides an additional level of enhanced product data in a consistent, structured format that will integrate seamlessly into your project workflow.

Commercial Office Lunch & Learn Sessions

Our commercial office specification experts are available to help with developing knowledge surrounding Flooring, Barrier Matting, Wall Protection, LED Lighting, Stair Edgings and Floor Trims.

For something less formal than a traditional CPD, a Lunch & Learn session with our commercial office specialists can be arranged at a time and date to suit you and people can drop in as they wish to discuss our products generally or address specific project requirements.

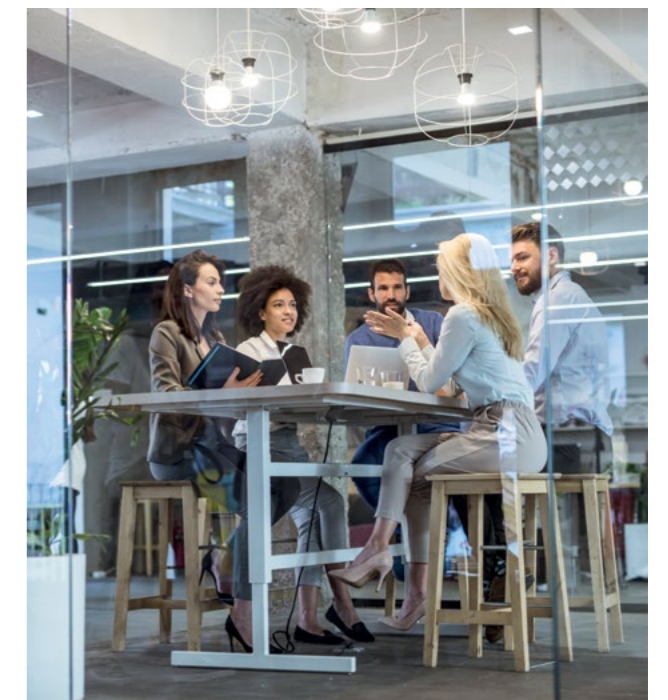

To book a Lunch & Learn session, contact our Technical Support team on 01625 428922, email contractuk@gerflor.com or imail@gradus.com

CPD's and Training

As members of RIBA CPD Providers Network, we offer a full range of RIBA assessed and approved CPD seminars covering: Vinyl Flooring, Sports Flooring, Matting, Wall Protection, Stair Edgings and sector specific CPD's such as Healthcare and Industry.

To book a CPD Seminar, contact our Technical Support team on 01625 428922, email: contractuk@gerflor.com or imail@gradus.com

Entrance & Reception Areas

Welcome employees and visitors with a safe, accessible entrance using Barrier Matting to remove and retain dirt and moisture, reducing slips, maintenance costs and extending the lifespan of surrounding floorcoverings. Pair with realistic wood or mineral LVT and custom printed Wall Cladding for a clean, branded and lasting entrance.

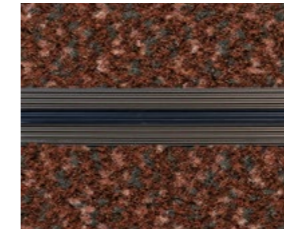

Primary Barrier Matting – Esplanade 5000 & 6000

Effectively absorbs dirt and moisture in areas with medium to heavy foot and wheeled traffic. Offered in a variety of ECONYL recycled nylon wipers and mill finish or bronze anodised aluminium.

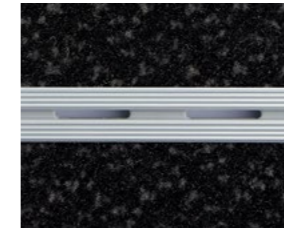

Boulevard 5000 Mallard Wiper

Server Rooms

Server rooms require specialist flooring to protect sensitive equipment. ESD Flooring provides electro-conductive surfaces that safely manage electrostatic charges, ensuring a controlled environment and reducing the risk of damage to critical IT infrastructure.

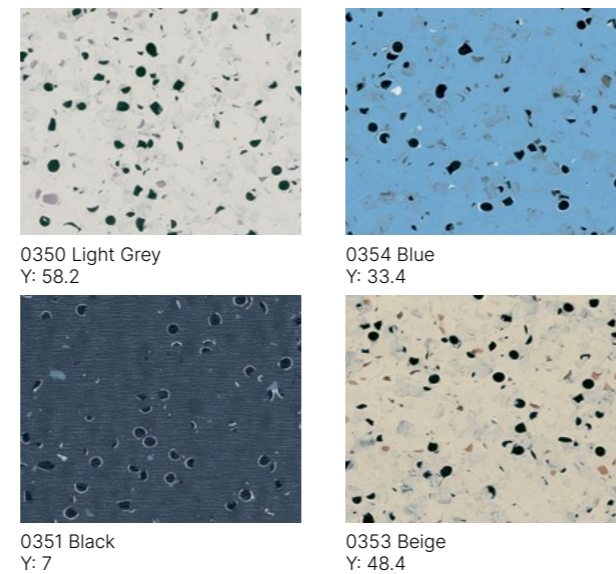

ESD Flooring – Mipolam Robust EL7

Static-dissipative vinyl for server rooms that is available in sheet and tile formats with marbled designs and resistance of $10^6 \leq Rt \leq 10^8 \Omega$ (EN 1081).

ESD Flooring – GTI EL5 Connect

Electro-conductive tiles featuring dovetail edges for fast installation and repair, with resistance of $5 \times 10^4 \leq Rt \leq 10^6 \Omega$ (EN 1081) for optimal ESD protection.

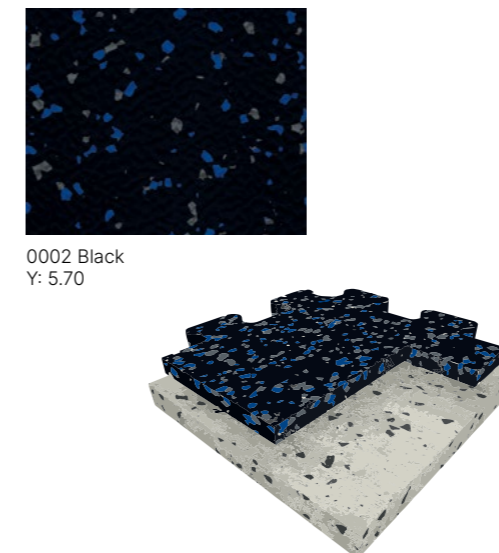

Gym & Exercise Studios

Offices with gym spaces and exercise studios need specialist flooring that withstands heavy use from free weights, cardio machines and multifunctional activities like yoga and pilates. Gerflor deliver durable, safe and comfortable floorcoverings specially designed for high-performance fitness environments.

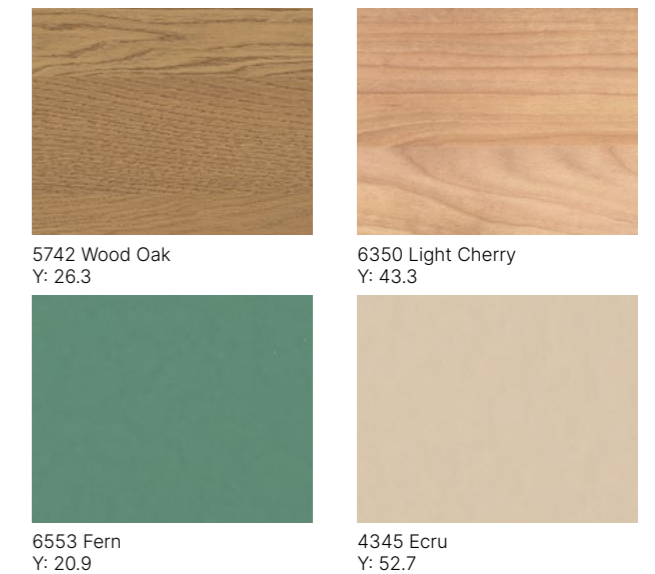

Gym Flooring – Powershock 80

Shock-absorbent and sound-insulating, Powershock 80 is ideal for cardio zones and free-weights areas, delivering durability and comfort for high-impact gym environments.

Sports Flooring – Taraflex Evolution SL

P1 sports floor that combines comfort and safety and is ideal for a diverse range of activities. Made using 81% natural or recycled content in a loose lay format for easy reuse.

Innovation, Service & Design

Bespoke Floor and Wall Solutions

Gerflor & Gradus offer bespoke floor and wall solutions for truly custom interiors that exceed expectations. Gerflor provides a unique flooring customisation service called MyFloor. With this exclusive offering, you can personalise your floors for a distinctive look. MyFloor includes MyTaralay vinyl flooring and MyCreation LVT flooring, allowing you to customise the floors in different ways from changing the colour of an existing design to using a completely original design. Gradus offers an innovative bespoke wall cladding service by printing custom designs and images onto PVC-u sheets to showcase a particular brand or complement a specific design scheme. Together, Gerflor & Gradus can offer tailor-made floor and wall solutions for a complete individual solution.

Floor Plan Design Service

For projects, Gerflor & Gradus offer a free floor plan design service to provide a bespoke design scheme that falls within your specific budget. Utilising your CAD drawings, our in-house Creative Design Team will provide a floor plan that shows a coordinated floor scheme using a combination of products from Gerflor & Gradus' portfolio such as Carpets, LVT, Resilient Flooring, Safety Flooring, Barrier Matting, Wall Protection, LED Lighting and Stair Edgings. The floor plan aims to offer solutions that are the most suitable product for the specific areas in terms of the latest guidance as well as aesthetics, performance, and durability.

Colour Contrast

Colour contrast and light reflectance value (LRV) are key to meeting UK building standards and promoting inclusive design. Colour contrast is the difference between adjacent surfaces, while LRV measures reflected light. Using high-contrast colours and LRVs that meet recommended standards - such as a 30 point difference between floorcovering and stair edging - creates safer, more accessible spaces. These considerations help people with visual impairments navigate environments effectively and support compliance with accessibility regulations, including the Equality Act and Building Regulations Part M.

2030 Targets

Aligned with these priority issues for 2026-2030, we are setting an ambitious and quantified roadmap. These include 10 key objectives that demonstrate our engagement to act on climate action, resource efficiency, circularity, our users and our employees.
