SparClean®

New generation of surface treatment for Tarasafe safety flooring.

SparClean® is a powder coated treatment that when heated forms a totally smooth surface between the mineral crystal particles, eliminating dirt traps and setting new standards for cleanliness and hygiene. The unique method of manufacture ensures that the slip resistance of the Tarasafe safety flooring is not impaired in any way, yet provides a safety floor that is easy to clean.

SparClean® is a permanent surface treatment that gives extreme resistance to soiling and staining, offers excellent resistance to chemicals and ensures long term product durability.

Polyurethane surface treatment

PUR+ surface treatment provides excellent cleaning characteristics and improved resistance to scratching. It significantly delays application of wax and provides excellent resistance to chemicals.

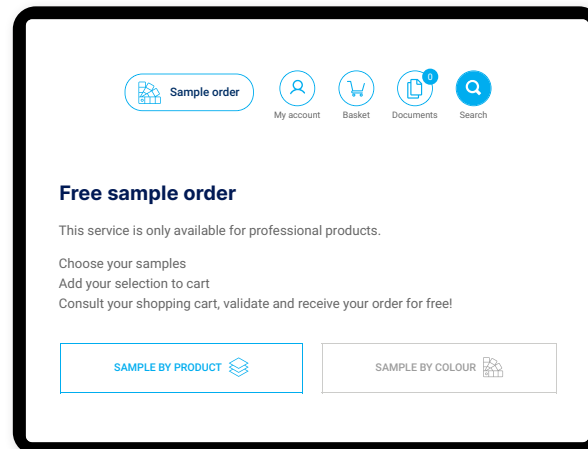

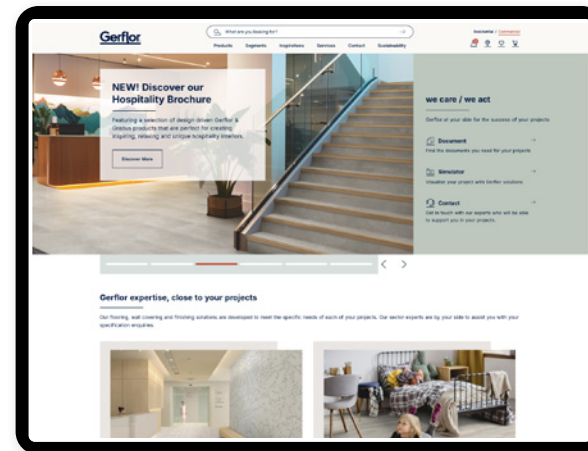

The original no-polish-for-life solution.

This unique UV-cured polyurethane surface treatment protects the floorcovering and eliminates the need for costly emulsion dressings throughout the life of the product.

Developed exclusively by Gerflor back in 1987, Protecsol® is a permanent, factory applied treatment which has been proven independently to reduce the time and costs required to protect standard, resilient floorcoverings.

Gerflor is an innovative manufacturer and continuously strives through heavy investment in R&D to meet and exceed its customers expectations both in terms of product quality and in low environmental impact.

New design, new navigation! A website you can access on your tablet or smartphone everywhere!
